1 Circular Motion

The seat of this swing is connected to two cables as shown; one of which is horizontal. The seat swings in a horizontal circle in such a way that the linear velocity (into the board) is 25.13 m/s. If the seat weighs 255N and a 825N person is sitting in it, find the tension in each cable.

Ans: 8370N, 1410N
